

# CANBERRA

Vertical and horizontal lines clash and embrace the fire, while different forms envelop it. The properties of majolica – a live, warm material that harnesses and diffuses the fire's heat – are enhanced by a marked yet elegant decoration. Finely-worked details bestow a unique and refined touch to this fireplace. Available in a wide range of colours, both monochrome and bi-colour, on request (in the picture, Bianco and Tortora majolica, MC 90/44 wood-burning firebox).
